Technical framework — where health data lives, and who decides what

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference or hosting in France, 0 transfer outside the EU in the target architecture · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **A medical office handles service users' most sensitive data.** This document states where that data is processed, by whom, what never leaves, and who decides what.

Two architectures, one guarantee

Point	Local inference	Isolated resource hosted in France, dedicated to health data
Where the computation happens	**On a machine at the hospital**	**Dedicated environment in France, under French law, approved for health data hosting**
Data leaving the network	**None**	**Deployment objective: processing and access within the European Union**

Point	Local inference	Isolated resource hosted in France, dedicated to health data
Pooling with another establishment	**Not applicable**	**None — one resource per establishment**
Cloud Act and FISA 702	**Exposure reduced by design**	**Exposure reduced by design — those texts target the company, not the location of its machines, and location alone does not guarantee immunity**
Training a model on your data	**Never**	**Never**

The protections applied

Protection	Coverage	What it makes possible
Encryption in transit and at rest	Patient record, dictations, clinic letters	A disk copy yields nothing
Role-based access	**11 users, 4 roles**	**An assistant opens their own division's letters, not another department's**
Strong authentication	All accesses	A shared account opens nothing
Full access logging	**Who opened which record, when**	**Answering a service user exercising their right of access, and the data protection officer**
Secure health messaging	All medical correspondence	No medical information by ordinary email

Who decides what

Decision	Who takes it	What traces it

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Approve a clinic letter and the coding of procedures	**Doctor**	Named sign-off, dated
Approve a letter or an appointment letter	**Medical administrative assistant**	Secure messaging dispatch log
Settle the diary rules	**Nurse manager**	Rule register, with history
Open an access right	Management	Role matrix, with history
Settle the alert limits on results	**Lead doctors**	Dated register, reviewed each year

> **Over the quarter: 0 decision with a legal or significant effect taken by an agent**, across **4,030 clinic letters, 1,610 letters, 9,400 appointments and 3,780 pre-codings**. This is not a switchable setting: approval technically conditions dispatch, transmission and booking.

To be settled

Date of the first quarterly compliance review with the data protection officer: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
