Procedure pre-coding, and batch sign-off mandate

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

3,780 proposals, 9.4 % amended · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **Pre-coding is built from the clinic letter APPROVED by the doctor, never from the raw letter.** Coding from an unapproved text means coding from a text that can still change.

The quarter, figure by figure

Measure	Value	Reading
Consultations in the quarter	4,030	—
Pre-codings proposed	**3,780**	**250 new or combined situations: the agent put forward the two candidate codes and the question to settle — all settled in 50 minutes over the quarter**

Measure	Value	Reading
Proposals amended by the doctor	**9.4 %**	**The figure that measures the agent's quality, published as it stands**
Procedures carried out and never coded, recovered	**412 proposed, 389 retained**	**Not extra procedures: procedures that had taken place and were recorded nowhere**
Proposals flagged as risking over-coding	**27**	**A pre-coding correcting in one direction only would be an income tool, not an accuracy tool**

The four boundaries of the sign-off mandate

Boundary	Proposed value	Why it is there
Scope	**Outpatient procedures in the 5 specialties, excluding any new or amended procedure**	**A new or amended procedure stays signed off one by one**
Cap	**40 procedures per batch, one batch per clinic session**	A batch that cannot be read through is not a sign-off
Term	**Until 31/12/2026, no tacit renewal**	**A mandate that renews without anyone thinking about it is no longer a mandate**
Reversibility	**Every signed-off procedure stays amendable, with date and author**	Revoking the mandate undoes nothing already signed off

What the mandate buys, costed: sign-off goes from **4 minutes per consultation to 25 seconds per procedure signed off in a batch**, that is **190 hours given back over the quarter** — and the doctor still sees every line before signing.

> **No coding is approved automatically.** The sign-off is the condition of transmission: not a tick box that could be left unticked by default, but the step without which

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
