Thursday slot — four patients waiting

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration; patients are shown by initials. **The four patients are presented in the order they were listed, and in no other order.**

Rank	Patient	Listed	Waiting	Declined an early slot?
1	Mr R.	16/07/2026	**23 days**	No
2	Ms T.	18/07/2026	21 days	**Yes, on 24/07**
3	Mr D.	19/07/2026	20 days	No
4	Ms L.	21/07/2026	18 days	No

Order of listing is an administrative criterion. "Whoever needs it most" is not, and it is not computed. If the clinician wants another order, they give it — that is their decision and it is entirely theirs.

What the last column avoids

Ms T. declined an early slot on 24 July. That is diary information, not health information: it saves a call whose answer is already known, and it implies nothing else.

What each call preparation contains

Element	Present?
Slot and duration	**Yes**
Date listed	**Yes**
Recorded administrative reason	**Yes**
Slots already declined	**Yes**
Anything from the medical record	**No — never**
A computed priority order	**No — never**

Reception needs no clinical element to offer a date. That is what allows this preparation to exist without any health data circulating.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
