

8 a.m. no-shows — 4% to 9%

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

6 weeks · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The agent does not say the setting is the cause.** Six weeks is short, and a calendar coincidence remains possible.

Slot	Rate before	Rate after	Change
8.00 a.m.	4%	9%	× 2.25
9.00 a.m.	5%	5%	—
11.00 a.m.	4%	4%	—
2.00 p.m.	6%	6%	—
5.00 p.m.	7%	7%	—

The stability of every other slot is what rules out a general cause. A rise driven by season, patient mix or a change of practice would show everywhere.

What changed six weeks ago

Element	Before	After	Date of change
Time of the day-before reminder	6 p.m.	8 p.m.	26/06/2026

What the reminder time changes, for an 8 a.m. appointment

Reminder at	Time before the appointment	What the patient can still do
6 p.m.	14 h, including an evening	Notify, reorganise, cancel
8 p.m.	12 h, including a night	Little

The test proposed

Element	Content
Change	Back to 6 p.m., slots before 9 a.m. only
Measurement period	6 weeks
If the rate returns to 4%	The question is settled
If not	One hypothesis has been eliminated

The last row matters as much as the one before it. A test that does not conclude the hoped-for way is still a useful test, and saying so in advance avoids presenting it as a failure.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
