Eighty-seven per cent, and three modules at twelve

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The overall figure is true, and it describes exactly the opposite of reality.**

Module	Coverage	Role
Payment calculation	**12%**	**Critical**
Payment recording	**19%**	**Critical**
Bank reconciliation	**24%**	**Critical**
List display	**96%**	Presentation
Formatting	**98%**	Presentation
Overall	**87%**	**—**

> **A team optimising its coverage tests first what breaks least**, because it is also the simplest to test. The indicator rewards exactly the wrong effort.

What the agent publishes

Figure	Published?	Why
Overall rate	**No**	**Two products at 87% can be in opposite states**
Coverage of critical modules	**Yes**	**Three figures, not one**

Who writes the list of critical modules

Step	Who	Result
Proposal based on past incidents	**The agent**	**7 modules**
Decision	**The company**	**5 kept, 2 added**

The two added were not on the agent's list — which is why the list is not inferred.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
