Two hundred and fourteen functions, sixty-six with no source

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **If the function rounds wrongly, the test checks that it rounds wrongly** — and the day somebody fixes it, it is the test that gets fixed.

Situation	Functions	What the agent produces
A source describes the intended behaviour	**148**	**Tests**
No source	**66**	**Questions**

What counts as a source

Source	Accepted?
Specification	**Yes**
Ticket	**Yes**

Source	Accepted?
Comment describing the intent	**Yes**
Written business rule	**Yes**
The code itself	**No**

> **The code is not a source of what the code should do.** It is the shortest statement of this whole demonstrator.

What the 66 revealed

Finding	Count
Questions asked	**66**
Answers within a week	**55**
Business rules nobody could state	**11**

It is the most useful result of the exercise, and it is not a test.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
