Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **An automatic rerun turns a test that finds a real defect into a test that always ends up passing.**

Test	Failure rate	Reruns	Fails when…
1	**1 in 6**	**68**	**Another test touches the same table**
2	1 in 8	**54**	**Same**
3	1 in 5	**61**	**Same**
4	1 in 9	**39**	**Same**
5	1 in 7	**48**	**Same**
6	1 in 12	**24**	Undetermined
7	1 in 15	**18**	Undetermined

> **Five of seven fail only when another test touches the same table.** That is a lead, not a conclusion: the agent supplies the correlation and does not say which of the two causes is the right one.

The two possible causes, and what separates them

Cause	Recognisable in the log?
The test depends on what it does not control	**No**
The code itself is unstable	**No**

What the agent does with the test

Action	Done?
Rerun it	**No**
Mark it flaky	**Yes**
Take it out of the merge decision	**Yes**
Disable it	**No — it keeps running and reporting**

A test rerun until it passes was already blocking nothing: it was wasting time without protecting.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the
