Sixty-six questions, fifty-five answers

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **A test written on an assumption is exactly the same shade of green as a test written on a rule.**

What the agent supplies for a function with no source

Element	Supplied?
What the code does today, in one sentence	**Yes**
The points where behaviour may be deliberate or accidental	**Yes, 3 to 4**
A test	**No**
The most likely interpretation	**No**

An example, as it stands

"*This function returns zero when the list is empty. Is that the intended result, or an unhandled case? Depending on the answer, the test to write is not the same — and one of the two will fail.*"

Outcome	Questions
Answered within a week	**55**
Unanswered	**11**

> **The eleven unanswered are the ones that matter.** They stay open and reappear every month — the only thing the agent repeats.

Why a question beats a test at that moment

Deliverable	What it produces
A test on an assumption	**A green suite and an invented rule**
A question	**A two-line answer, in 83% of cases**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
