Forty-one tests, from 87% to 79%

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

1,240 tests · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **It is a mechanical check, not a judgement of style**: each function's return was replaced with a constant value, and all 41 tests still pass.

What the test checks	Tests
A result, via an assertion	**1,199**
That no error is raised, and nothing else	**41**

> **They count in coverage, they count in the number of tests, and they give the feeling that the function is tested.** A team seeing "covered" does not rewrite the test.

What the agent does, and does not

Action	Done?	Why

Mark them "no result assertion"	**Yes**	**The defect becomes visible**
Take them out of published coverage	**Yes**	**The figure becomes honest again**
Delete them	**No**	**They still check that the code runs**
Write the missing assertions	**No**	**With no source, that would carve current behaviour in**

Coverage	Value
Displayed	**87%**
Excluding assertion-free tests	**79%**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
