Approval — times measured over a trial month

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The gain on matching invoices is nil, and that is written here rather than omitted.** The tool saves no time on what was already fast.

Type of invoice	Volume	Before	After	Gain
Matching	**187**	**40 s**	**40 s**	**None**
With a gap	**27**	**14 min**	**4 min**	**10 min**
Monthly total	214	8 h 25	5 h 05	**3 h 20**

Three hours twenty a month is not the main argument, and presenting it as one would be dishonest. The real gain is elsewhere: the 27 gaps are handled the week they arrive instead of the following month.

What handling within the week changes

Gap handled	The following month	The same week
Partial delivery	The storeman no longer remembers	**He remembers**
Price off the purchase order	The sales contact has changed	**Same contact**
Invoice with no commitment	**Nobody knows who ordered**	**The requester is identifiable**

What the approver receives

Element	Matching	With a gap
Presentation	**Grouped by supplier**	**One at a time**
Documents alongside	**Yes**	**Yes**
Gap named	—	**Yes**
Discount flagged	**Yes**	**Yes**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
