Document issued on 09/11/2026

47 reports · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **An unread report costs the same as a read one.**

Item	Kept?	What it allows
Title, source, date, address of every article	**Yes**	**Finding the original**
The criterion that selected it	**Yes**	**Contesting a selection**
Repeat count	**Yes**	**Not taking 9 articles for 9 items**
The subject's tempo	**Yes**	**Seeing what accelerates**
Each source's state	**Yes**	**Spotting a dead source**
The articles themselves	**No**	**References are enough**

The figure published against the agent

Finding	Value

Reports sent in eleven months	**47**
Opens	**3**

> **It is the only measure that says whether the watch serves any purpose** — and the agent put it in place before being asked.

What that figure changed

Before	After
Full weekly report	**A flag when something moves, plus a monthly summary**

A watch's right format follows from its readership, not from a habit.

The quietest defect

Finding	Value	What was read instead
Source with no publication	**Since 12 April**	**An absence of news, for four months**

> **A dead source raises no alert: it produces calm**, and calm does not flag itself. Each source's tempo is now monitored, not only its content.

For the company to settle

Source silence triggering an alert: _____ days

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
