Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A reader seeing a subject come back nine times concludes it is major.**

Nature of the article	Count
Press release reproduced with nothing added	**7**
Quoted with comment	**1**
Interview with somebody	**1**

Nine articles within 36 hours, across nine sources, on the same subject — announced once, by one person.

What the report entry becomes

Element	Content
Entries	**1 instead of 9**
Note carried	**"picked up by 9 sources, 2 of which add something of their own"**

Element	Content
Link given	**The original, not the best-ranked reprint**
The other 8	**Listed — who picked it up and how fast is sometimes the information**

Across everything collected	**Count**
Articles collected	**1,340**
Reprints with nothing added	**412**

The report drops from 60–90 items to about forty before any selection at all.

> **Request a demo with your own documents**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
