Twelve sources, one empty since April

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A source that answers "nothing" is invisible**, and it produces the reassuring signal nobody ever checks.

Source	Last article	Articles over 11 months	State
Source A	**This week**	**312**	Live
Source B	**This week**	**187**	Live
Source C	**12 April**	**0 since April**	**Empty feed, responds perfectly**
Nine others	**This week**	**40 to 300**	Live

How the gap is detected

Signal	Detected?
Source erroring out	**Yes — visible everywhere**
Source answering "nothing"	**Yes, now — through the gap from usual rhythm**

Signal	Detected?
Source that published 3 times a week and goes quiet for a fortnight	**Flagged**

> **The agent does not conclude that a source is dead.** It may be paused, may have changed address, or may have nothing to say. It flags the gap, somebody looks.

Here: the source changed address in April. The old one still answers, and it is empty.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
