Source freshness — 74 applications

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

4 applications over threshold, deposit rhythm to revisit · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. Group, subsidiaries, accounts, applications and people are invented — on this subject, the people whose access is discussed are invented too. **No write is made to any real system. The 24-hour threshold is the one set by the client**, it is not imposed by the agent.

The four applications over threshold

Application	Deposit rhythm	Age on 02/09	Accounts affected	Handling
Property management	**Manual, monthly**	**96 h**	**87**	**Stale source**
Concessions tracking	Manual, monthly	**96 h**	34	**Stale source**
Room booking	Manual, quarterly	**61 days**	22	**Stale source**

Application	Deposit rhythm	Age on 02/09	Accounts affected	Handling
Technical archives	Manual, on request	**184 days**	9	**Stale source**

What four days change, measured

On the SEM's history, **four days represent 3 personnel movements on average**. Certifying as “compliant” an account closed the day before, or missing an account opened two days earlier, **produces false evidence**. **False evidence is worth less than no evidence:** the second is visible, the first is discovered during a control.

What is kept despite the staleness

The 152 accounts of the four applications **are worked through, their gaps calculated, their owners identified**. At the next deposit, **only the accounts that moved are recomputed**: the work is not redone.

The fix proposed

Proposal	Expected effect
Move the 4 deposits to a weekly rhythm	**Maximum age of 7 days outside campaigns, under 24 h on campaign day**
Set the deposit window on the eve of the opening	The 74 applications come within the threshold
Keep the “stale source” marking	**A dated result never presents itself as an up-to-date finding**

What is not proposed, and why it is written here

No direct link with the applications or the directory is in service, and none is announced on this offer. Such a link requires an authorisation from the provider, an access scope, a credential holder, call limits and incident recovery: **as long as those are**

not established and documented, they are not sold. What is sold here works on deposits, and a deposit has one advantage: **you always know how old what you are shown is.**

External writes: 0

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
