Emergency revocation circuit — Énergie Boréale

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

File ready, 4-minute median, pre-authorisation proposed · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. Group, subsidiaries, accounts, applications and people are invented — on this subject, the people whose access is discussed are invented too. **No write is made to any real system. No revocation has been executed**, neither in this demonstration nor anywhere else: the agent prepares, two people sign, the operator executes.

What is ready before the first signature

File element	State
Account and rights targeted	**Established**
Resources whose shutdown depends on that account	**3 controllers named, with their function**
Fallback procedure	**Drafted**

File element	State
Acknowledgement to demand from the operator	**Template attached**
Replayability of the order	**Idempotent**
Signatures	**Missing — the only element that is**

What the circuit actually costs, measured

Measure	Value	Source
Median of the two signatures	**4 minutes**	6 crisis drills on the site
Worst case recorded	**11 minutes**	6 crisis drills on the site
Establishing the list of resources affected, with no prepared file	**40 minutes**	Record of the last drill
The same, with the prepared file	**Immediate**	The file above

Why two signatures on this perimeter

Cutting an access on an industrial network can **stop production**. A cut decided on a mistaken suspicion is **itself an incident**, with its cost and its recovery time. **The second signature is the person who knows what the action stops**; without them, the first signs blind.

The proposal that removes the remaining time

A named pre-authorisation: two people designated in advance, reachable on call, whose agreement holds for any account in the perimeter during an open, dated crisis window. **It is signed once a year** and brings the four minutes down to under one. The text is attached to the file; **it carries the names of the two designated people and the length of the window.**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
