Shutdown windows — press 17, three scenarios

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

What each window costs, and what it risks · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **The agent books no window.** A slot blocked in a workload plan is a production decision, taken by someone who carries the workload. This document exists so it can be taken in three minutes.

The three scenarios

Scenario	Production lost	Time needed	Part	Margin against the projection
Saturday the 14th — weekly shutdown	**€0**	**2 h 10** (press 22 precedent)	**2 units in stock**	**22 days — recommended**
Thursday the 26th — 6-hour changeover	€0 extra	2 h 10	In stock	**Risk: job and changeover compete for the same technician**

Scenario	Production lost	Time needed	Part	Margin against the projection
Planned shutdown on the 11th of next month	€0 immediately	2 h 10	In stock	**Top of the range (8th to 22nd), on a penalty line**

The comparison that decides

	Job planned on Saturday	Equivalent unplanned stoppage
Duration	**2 h 10**	**7 h**
Parts	€180	€180
Production margin lost	**€0**	**€8,050**
Material rework	None	**Yes — press 9 precedent, invoice attached**

What is already prepared, going out on a click

Item	State	What releases it
Work order in the CMMS	**Draft, marked “proposed by the agent, not approved”**	Being opened by a human
Reservation of the 2 parts in stores	**Done — releases itself within 15 days**	—
March 2024 procedure	Attached to the work order	—
Note to the production manager	Drafted, not sent	Approval

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
