The fleet reviewed — 212 machines

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

What each machine already says, and what nobody was listening to · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. The review covers an invented site of **212 machines** and **1,340 sensors already fitted**. It proposes no purchase: it establishes **what the fleet already reports and nobody had time to read**.

The starting gap: 38 machines tracked, 14 unplanned shutdowns

Finding	Value	Reading
Machines in the fleet	212	34 presses, 6 chillers, 4 compressors, 21 conveyors, 147 ancillaries
Machines genuinely tracked closely	**38**	List drawn up on the value of the machine
Unplanned shutdowns over the year	14	96 hours of production lost
Of which on a machine outside the 38	**9**	**A short list is chosen on criticality, not on condition**

Finding	Value	Reading
Cost of the 96 hours, at €1,150 of hourly margin	**€110,400**	Not counting 2 late-delivery penalties applied by customers

The 14 shutdowns, by equipment family

Family	Machines	Unplanned shutdowns	Hours lost	Tracked before the review
Injection presses	34	5	41 h	**Yes — 34 of the 38**
Compressors	**4**	**3**	**22 h**	**No**
Chillers	**6**	**2**	**17 h**	**No**
Conveyors	21	3	13 h	No
Ancillaries	147	1	3 h	Partly — 4 of 147

Reading: compressors and chillers account for **5 shutdowns out of 14 and 39 hours out of 96** across **10 machines out of 212**. They were outside the watch list because they produce nothing — but **their unavailability stops everything else**.

What the review changes, without one extra sensor

Indicator	Before	After
Machines tracked continuously	**38**	**212**
Sensors used	≈ 240	**1,006**
Share of the methods engineer's time spent tracking signals	**65 %**	**7 %**
Hardware investment required	—	**€0**

Legal notice (in French): bluelemonagent.ai/mentions-legales

The list of 212 is corrected with a word. At every removal the agent states **what you stop being able to see** on that machine — because a removal with no stated consequence is a removal regretted six months later.

Families removed from tracking by the maintenance manager: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
