Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The conditions are technical, not moral: a creation is an act you do not come back from if they are not met.**

The three conditions of an open write

Condition	What it makes possible
The write carries its source identifier	Finding and undoing
The matching deletion exists	Going back
An identical replay creates no duplicate	Replaying without damage

What the agent writes alone once the conditions are met

Case	Volume recorded	State before
------	-----------------	--------------

Resuming operations left half written	41	First system accepted, second refused, nobody knew
Creations whose source identifier is kept	—	—
Updates whose source governs unambiguously	—	—

What still escalates, even with writing open

Situation	Volume	Why
Two systems carry a different price	3 % of shared references	Choosing means deciding a price

Both values are escalated **with their last-modified dates**.

What was stopped without asking

Finding	Value
Writes produced	1,400
Real changes	12
Cause	Two systems answering each other, each believing it received something new

For the company to settle

Governing system per field family: _____
