Three per cent of divergent references

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **"Most recent wins" is almost every connector's default — and it is wrong here.**

System	Update rhythm	Consequence
CRM	**Continuously, by the sales team**	**Almost always the most recent value**
ERP	**Monthly import**	**Stands for invoicing**

A clean, automatic convergence would have aligned invoices on prices nobody approved.

What the agent does

Action	Done?
Block synchronisation of the field	**Yes**
List divergent references, both values, both dates	**Yes**

Action	Done?
Ask which system stands for this field	**Yes**
Choose	**No**

Answer obtained, field by field

Field	System that stands
Price	**ERP**
Stock	**ERP**
Address	**CRM**
Contact	**CRM**

The question had never been put explicitly. Once written down, the 3% resolved in a single pass.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
