

Single source — 312 articles for 9 languages

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

2,808 pages kept current by 312 edits · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Each language is a VIEW of the reference article, not a copy.** It is the only architecture that stops nine versions drifting apart again.

What comparing the nine bases established

Finding	Value	Reading
Pages reviewed across the 9 country bases	1,240	Nine folders held separately
Reference articles retained	312	After merging duplicates
Pages produced by those 312 articles	2,808	312 × 9 languages
Substantive gaps between versions of the same content	148	Of which 12 commit the company

The clearest of the twelve

Version	Period stated	Actual undertaking	Situation
Germany	24 months	24 months	Correct
Netherlands	12 months	24 months	Two rewrites behind, dating from 2023
Sweden	36 months	36 months	Extension negotiated by the distributor — a legitimate specific

The time shifted

Task	Before	After	What remains
Keeping the languages consistent	60 % of a support writer's time	7 %	Reading over a reference article, written once
Working out which version is authoritative	Every time	Gone	The reference article is authoritative by construction

Immediate follow-up: the nine market managers read through the list of 148 gaps, already sorted and worked up. **The 1,400 Dutch customers who received the old period were contacted one by one, with a message stating the correct one.**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
