What I supply, what I do not conclude

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **What I handle are records: what was written down, not what happened.**

Element	Supplied?
Grouped NCs, common factors and differences	**Yes**
History of batches and interventions over the period	**Yes**
Earlier NCs at the same place	**Yes**
Actions tried on neighbouring cases and their outcome	**Yes**
The cause	**No — it is established by going and looking**

The counter-example that serves as the rule

What the records pointed to	What the real cause was
A worn tool: age, gradual drift, last change date	**A sensor refitted wrongly after cleaning**

> **Invisible in every readable record.** An automatic analysis would have produced a **coherent, sourced and wrong** file.

What is flagged instead

Flag	What it indicates
Analysis followed by no recurrence for six months	**Nothing contradicts it**
Recurrence despite an action judged effective	**The analysis was wrong**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
