What is written to a tenant, and what never is

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **An automatic answer on how costs split is a legal position taken without a file — and it is in writing, therefore enforceable.**

Content	Written?
Acknowledgement with the real observed timescale	**Yes**
Progress	**Yes**
Works date confirmed by the contractor	**Yes**
Follow-up question after the visit	**Yes**
Unconfirmed timescale commitment	**No**
Answer on how costs split	**No**
Position on a dispute	**No**

Content	Written?
Refusal to take a case on	**No**
"Estimated" works date	**No**

> **An announced date is waited for**: a tenant who takes a half-day off for nothing does not do it twice, and they stop believing the dates that follow.

What is done with legal questions

Passed to whoever manages the lease, **telling the tenant the answer will come from a person, and within what time.**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
