Twenty-three arrivals with no access — nine days before the request

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **IT is not at fault: it receives the requests after the arrival.**

Step	Average time
Contract signature → access request	**9 days**
Request → opening	**1.4 days**
Total as felt by the arrival	**6 days after arriving**

The delay is in the request, not in IT. That is what decomposing it changes, and neither of the two departments involved could see it from where they stood.

Indicator	Value
Arrivals over 12 months	**41**

Indicator	Value
With no access on day one	**23**
Days present with no means of working	**~138**

> **That is the measurable part, and it says nothing about what the person makes of it.** The agent sticks to what it can count.

What is proposed

Proposal	Nature
Request triggered at contract signature	**A trigger**
Arrival date as the deadline	**A trigger**
Reorganising the department	**Not proposed**

What stays with your signature — and what it sets off

What you sign	What the agent has already prepared	What you gain
The access scope for the post	**The request, ready and triggered at contract signature**	**The 9 days of request delay fall away; only the 1.4 days of opening remain**
The default rights of a profile	**The record of accesses requested, post by post**	**An over-wide access is never noticed: this one is decided by whoever knows the post**

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
