Twenty-nine promises, eleven came to nothing

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

41 arrivals · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A promise kept protects the person arriving; a reservation kept precedes them.** That is the only criterion used.

Subject of the promise	Promises	Honoured at 6 months
Equipment	**9**	**7**
Training	**8**	**4**
Hours	**7**	**5**
Progression	**5**	**2**
Total	**29**	**18**

Indicator	Value
Promises with no effect at 6 months	**11**

Indicator	Value
Of which written in the interview record	**6**

> **A hiring promise not honoured is the first gap an arrival notices, and the only one they remember at six months.**

What is reported, and to whom

Element	Recipient
The 11 promises, with their date	**HR**
The name of whoever made it	**Not passed on**
A message to the arrival	**No**

The name of whoever promised is not passed on: it is the company that owes, and a commitment made at interview binds beyond the person who made it.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
