Two delegates whose data location stays unknown · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. The values below are the ones the engine actually read from the case: they recompute, they are not transcribed.

Observed values

Field	Value	Nature
serviceOwner	**declared empty**	declared unknown — neither pass nor fail

Result

Output	Value
State opened	**criticality to be established**
Priority	**P3**
Fact retained	**criticité non validable**
Non-compliant controls out of 12	**12**

Output	Value
Unknown factors	**1**
Displayed confidence	**90 %**
External writes	**0**

> **An unknown is neither an automatic failure nor an implicit pass.** It lowers displayed confidence; it does not raise the score by a point.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
