Third-party portfolio — relationships and services

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Mutuelle Verdanne — fictional book-II mutual, 190,000 people covered · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. The values below are the ones the engine actually read from the case: they recompute, they are not transcribed.

What the register links

Business object	What it carries
convention de délégation de gestion	owner, contract, service supported, review date
contrat d'opérateur de tiers payant	owner, contract, service supported, review date
annexe de traitement des données de santé	owner, contract, service supported, review date
registre des prestataires de gestion	owner, contract, service supported, review date

The segment rules, applied as written

Rule
Une donnée de santé confiée à un délégataire relève d'un régime renforcé : l'annexe de traitement et la localisation se démontrent, elles ne se présument pas.
Un opérateur de tiers payant voit passer l'intégralité des consommations de soins : sa criticité se mesure sur l'exhaustivité, pas sur le montant.
Une mutuelle décide en assemblée : l'acceptation d'un risque significatif remonte au conseil d'administration, avec son dossier.

Counting unit for this file: **personnes protégées**.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
