> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. The values below are the ones the engine actually read from the case: they recompute, they are not transcribed.

What the register links

Business object	What it carries
contrat de composition et d'impression	owner, contract, service supported, review date
convention de diffusion-distribution	owner, contract, service supported, review date
registre des fichiers d'abonnés	owner, contract, service supported, review date
annexe de confidentialité des manuscrits	owner, contract, service supported, review date

The segment rules, applied as written

Rule

Un manuscrit sous embargo transite par la composition, la relecture et l'impression : chaque maillon doit porter la même clause de confidentialité, ou la chaîne vaut son maillon le plus faible.
Le diffuseur-distributeur détient le fichier des libraires et souvent celui des abonnés : sa criticité est commerciale autant que technique.
Un imprimeur qui sous-traite un tirage à l'étranger change la localisation des fichiers sans que rien ne le signale.

Counting unit for this file: **titres par an**.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
