Third-party portfolio — relationships and services

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Airnove Mobile — fictional mobile virtual network operator · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. The values below are the ones the engine actually read from the case: they recompute, they are not transcribed.

What the register links

Business object	What it carries
contrat d'accueil sur le réseau hôte	owner, contract, service supported, review date
contrat de fourniture de cartes SIM	owner, contract, service supported, review date
registre des plateformes de services	owner, contract, service supported, review date
plan de migration d'opérateur hôte	owner, contract, service supported, review date

The segment rules, applied as written

Rule

Un opérateur virtuel dépend entièrement de son hôte : la substituabilité est une question de survie, pas de conformité.
Un fournisseur de cartes SIM détient les clés d'authentification des abonnés : sa compromission est la compromission du parc.
Une migration d'opérateur hôte est un plan de sortie déguisé : elle se teste avant d'être nécessaire.

Counting unit for this file: **lignes actives**.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
