Third-party portfolio — relationships and services

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Ovance Télécom — fictional business communications operator · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. The values below are the ones the engine actually read from the case: they recompute, they are not transcribed.

What the register links

Business object	What it carries
contrat d'accès à l'infrastructure	owner, contract, service supported, review date
convention d'interconnexion	owner, contract, service supported, review date
registre des opérateurs sous-jacents	owner, contract, service supported, review date
plan de rétablissement de service	owner, contract, service supported, review date

The segment rules, applied as written

Rule

Un opérateur qui revend la collecte d'un autre dépend d'une infrastructure qu'il ne maîtrise pas : le client a droit à cette information avant de signer un engagement.
Deux liens vendus comme redondants qui empruntent la même boucle locale ne sont pas redondants : la vérification se fait sur le tracé, pas sur le contrat.
Une obligation légale d'interception se sous-traite techniquement mais jamais juridiquement.

Counting unit for this file: **liens actifs**.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
