Third-party portfolio — relationships and services

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Groupe Vaubrun — fictional holding company with eleven industrial subsidiaries · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. The values below are the ones the engine actually read from the case: they recompute, they are not transcribed.

What the register links

Business object	What it carries
convention de prestations intragroupe	owner, contract, service supported, review date
mandat de trésorerie centralisée	owner, contract, service supported, review date
cartographie des filiales	owner, contract, service supported, review date
registre des délégations	owner, contract, service supported, review date

The segment rules, applied as written

Rule

Un outil mutualisé entre filiales est évalué UNE fois et rattaché à chaque filiale utilisatrice, jamais onze fois à l'identique.
Une convention intragroupe qui ne nomme pas la sécurité du service rendu est un écart de clause, pas une omission de forme.
La holding n'accepte pas un risque à la place d'une filiale : chaque acceptation porte le nom de son dirigeant.

Counting unit for this file: **filiales**.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
