Document issued on 09/11/2026

Crédial Financement — fictional specialised finance company · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. The values below are the ones the engine actually read from the case: they recompute, they are not transcribed.

| Measure | Evidence required to close |
|---|---|
| **Apporteurs sous convention de sous-traitance** | dated, signed document, with its scope |
| **Données d'octroi traçables jusqu'à leur fournisseur** | dated, signed document, with its scope |
| **Mandats de recouvrement portant une clause de contrôle** | dated, signed document, with its scope |
| **Dossiers refusés dont la donnée est reconstituable** | dated, signed document, with its scope |

## Segment exceptions, written and reasoned

| Exception |
|---|

| |
|---|
| Un apporteur qui transmet un simple contact sans pièce ne traite pas de données de dossier : le régime diffère et se motive. |
| Un prestataire de données publiques ne relève pas du même niveau d'exigence qu'un fournisseur de données personnelles. |

> **A measure closes on its document, not on a promise.** Remediation closed without evidence stays open in the file.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
