Question log — and what did not come back

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Groupe Sillac — fictional industrial equipment maker, four production sites · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. The values below are the ones the engine actually read from the case: they recompute, they are not transcribed.

Segment vocabulary	What it designates in the file
fournisseur numérique	business term, used as-is in the questions asked
service soutenu	business term, used as-is in the questions asked
fonction critique	business term, used as-is in the questions asked
preuve d’audit	business term, used as-is in the questions asked
sous-traitant ultérieur	business term, used as-is in the questions asked
concentration	business term, used as-is in the questions asked

A non-response carries the date of the question, the follow-up dates and the name of whoever did not answer.

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
