Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Health data is open to the medical adviser and to nobody else, and that is verifiable with one command rather than on trust.**

Compartmentalisation, point by point

Point	Implementation	What the insurer can state
Health data	**12 fields in a separate space, encrypted apart, key not held by the five other roles**	“Only the medical adviser opens them”
Encryption	**In transit and at rest, keys held by the insurer**	“A stolen file stays unreadable”
Backups	**Encrypted, hosted in France**	“The copy travels no further than the original”

Point	Implementation	What the insurer can state
Model training	**No data used, neither for us nor for a third party**	“What the agent learns here serves here”
Hosting	**France, under French law, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity**	“Including against an American operator hosting in Europe”
Logging	Every opening, including the medical adviser's	“We know who read, and when”

A compliance controller opens the file, its timeline and its administrative documents; he does not open the medical data — and he has no need to open it to do his job. The matrix states it in black and white, which is the best answer to give an auditor who asks.

The three figures of the year

Indicator	Value
Out-of-role access across 4.7 million actions	**0**
Data taken outside the insurer's perimeter	**0**
Transfers outside the European Union	**0**

What it is worth commercially

Fact	Value	What it opens
Third-party administration mandates	**34**	*Running another organisation's schemes on its behalf, with its members and its data*

Fact	Value	What it opens
of which framework contracts requiring hosting in France and a demonstration of compartmentalisation	**11**	**Showable in writing, dated, with no preparatory work**
Sheet requested at renewal	1 a year per principal	**Used to take three days to find; it is maintained continuously**

> **Keep this page for the end of a renewal meeting.** Few administrators can show their principal the dated list of who accesses what, and the log that proves it.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
