

Six business uses on a single regulated foundation

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

11 weeks, then 3, then 12 days · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The first use paid for the compliance file; the five that followed inherited it.** It is not the uses that got shorter: it is the file that no longer had to be rebuilt.

The six uses and what each gave back

Use	Annual volume	Measured gain
Member questions about statements	138,000	First answer: 4 days → 20 minutes
Income protection claims	8,560	22 days → 6 days
Checking member companies' onboarding documents	1,900 files	Completeness checked on the day of filing
Complaints	4,200	File rebuilt before the first reading

LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

Use	Annual volume	Measured gain
Annual review of group schemes	1,900 contracts	Amendment / configuration gaps raised before the review
Maintaining the operating documentation	Continuous	It is what the auditor will read in March

Go-live lead time, use after use

Use	Request → go-live	What explains it
First	11 weeks	Compliance file written in full
Second	3 weeks	File inherited, only the use specification to write
Sixth	12 days	Specification signed in 2 days, go-live in 10

What a use must produce to exist

Element of the use specification	Who writes it	Who signs it
Purpose, in plain language	The agent, from the business request	The requesting department
Fields requested and fields needed, with the gap quantified	The agent	The compliance department
Authorised roles	The agent, from the matrix	The security officer
Retention period	The agent, from the register	The compliance department

Across the six uses, the initial request carried 34 fields on average and the signed specification kept 12. None of the six asked to reopen a removed field: the business lost nothing, and compliance ruled on the document in **2 days on average against 5 weeks before.**

A use has access to no data until its specification is signed. This is not an after-the-fact check, it is the condition of access — and it is exactly what an auditor seeks to verify.

For the insurer to settle

Seventh use selected: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
