Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **"External cause" is the one conclusion nobody ever checks: it takes the file out of scope, therefore out of control.**

Item	Kept?	What it allows
Reproduction conditions and minimal case	**Yes**	**Reproducing the defect**
What was ruled out, and how	**Yes**	**Not concluding by elimination**
Closed files, conclusion and re-reading	**Yes**	**Controlling what leaves the scope**
Fixes and REAL deployment date per customer	**Yes**	**Not saying "fixed" wrongly**
Submissions received and their purge date	**Yes**	**Proving the data does not stay**

Item	Kept?	What it allows
Customer data beyond the minimal case	**No — purged**	**Diagnosing does not confer a right to keep**

What systematic re-reading showed

Finding	Value
Files closed as "external cause"	**41**
Re-read	**10**
Of which the cause was not external	**Several**

The "external cause" conclusion is now **re-read as a matter of principle.**

"Not reproducible", which is not a neutral category

Finding	Value
Share of files closed "not reproducible"	**22 %**
Files in fact describing one same defect	**7**

> **It is the fate reserved for the hardest defects.**

Customer data

Practice offered	Accepted?	Why
Permanent access to customer systems "to save time"	**No**	**Would turn an accident into a permanent state**
Dataset to reproduce, purged after the minimal case	**Yes**	**Strictly what is needed**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
