# Extract from the deposited official corpus — VR-2026-091

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

INPUT DOCUMENT · source passage, hash, two dates kept apart · fictional document

**Fictional document — demonstration example**

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

**Fictional in its form**: the internal identifier VR-2026-091, the hash, the pagination and the deposit timestamp belong to the invented corpus of the demonstration. **THE TWO DATES QUOTED BELOW, HOWEVER, ARE REAL AND VERIFIED**, and each is given with its exact scope. **No write is made in any real system, and no legal publishing platform is connected**: this is the document the client deposited.

## What the official collection recorded on this document

| Metadata | Value recorded on entry |
|---|---|
| Internal identifier | **VR-2026-091** |
| Corpus | European corpus opened by the client under its own mandate |
| Version compared | Consolidated 28/08/2026, against consolidated 14/03/2026 held |
| Deposited | 02/09/2026 at 06:40 — age at processing: **9 hours** |

| Metadata | Value recorded on entry |
|---|---|
| Hash of the normative content | **Different** from the version held — hence the opening of the file |
| Pages of the retained passage | p. 12, § 3 and p. 41, § 2 |
| External writes | **0** |

## The two dates, carried separately — publication and application are not the same thing

| What the passage establishes | Date | Exact scope of the statement |
|---|---|---|
| **Obligations for high-risk systems** | **2 December 2027** | Application date, moved by Regulation (EU) 2026/1744 amending Regulation (EU) 2024/1689. This is an APPLICATION date, not a publication date. |
| **Article 50 transparency** | **2 August 2026** | Obligation APPLICABLE since that date. It was not moved, and the text of the article did not change between the two consolidated versions. |
| **Employment and worker management** | — | Fall under **Annex III point 4** of Regulation (EU) 2024/1689: high-risk regime, therefore the 2 December 2027 calendar. This is not a prohibition. |

**These three lines are the very example of what the offer calls "two dates, never one".** A file carrying a single date would make the 2027 deadline read as though it covered the whole text — and the transparency obligation, applicable since 2 August 2026, would have gone unnoticed. That is the risk any file built on a single date carries, and it is why both are carried separately from entry.

## What the file does not settle by itself

| Item | State | Who settles it |
|---|---|---|

| | | |
|---|---|---|
| Characterisation: the text applies to the group | **Reasoned, sourced proposal, marked "not approved"** | The group general counsel, under her name and date |
| Role held by each company — provider or deployer | A proposal per entity, with the fact that grounds it | The group general counsel |
| Internal deadline entered in the plan | Proposed, aligned on the application date quoted | The compliance committee |

**A proposal keeps its "not approved" label even when it is detailed to the point of looking like a conclusion**, on screen and in exports. That label is what separates a working file from a decision — and it is what makes the decision, once taken, stand up.

Extract verified on _____ by _____ · role _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
