Collection log — September 2026

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Groupe Ternoise · 11 documents, 4 declared corpora · fictional document

Fictional document — demonstration example
This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. Group, companies, corpora, document identifiers, hashes and dates are invented. **No write is made in any real system. A document whose corpus has passed the freshness threshold is not counted as an up-to-date finding**: it waits for the next deposit.

The source register as the client approved it, and the age of each corpus at collection

Declared corpus	Authority and jurisdiction	Access method	Deposited	Age	Client threshold	Retained
European corpus opened by the client	European Union	**Opened by the client under its own mandate**	02/09/2026 06:40	**9 h**	72 h	**Yes**

Declared corpus	Authority and jurisdiction	Access method	Deposited	Age	Client threshold	Retained
National corpus deposited by the law firm	France	Manual monthly deposit	02/09/2026 07:15	**8 h**	72 h	**Yes**
Guidance — sector authority A	France	Manual deposit	01/09/2026 22:10	32 h	72 h	Yes
Guidance — sector authority B	Belgium	Manual deposit	01/09/2026 22:12	32 h	72 h	Yes
Publisher's newsletter	—	Manual deposit	02/09/2026 08:05	7 h	72 h	**Filed as commentary**

The source register was approved by the compliance manager on **14 March 2026**. Each corpus carries its authority, jurisdiction, subject, access method, frequency, named owner and fallback. **A publisher's commentary can be tracked and is tracked; it is filed as commentary and never grounds an alert on its own.**

What the official collection produced

Result	Count	What it means
Documents entered in the register	**11**	Identifier, canonical address, date and hash recorded for each
Re-publications with no change of content	**8**	Hash of the normative content identical to the version held
Real changes	**3**	At least one article, annex, definition, threshold, date or status amended

Result	Count	What it means
Files opened	3	VR-2026-091, VR-2026-093, VR-2026-088
Files that concern you	**2**	VR-2026-091 and VR-2026-093 — VR-2026-088 is a non-final text tracked in watch mode
Writes in a client system	**0**	The agent reads the deposited corpus and returns files; writes belong to the client's systems

The three files opened

File	Subject	Status of the text	Priority	What triggered the opening
VR-2026-091	Calendar for the "high-risk" obligations of the artificial intelligence regulation	In force	**1**	Change of application date in the consolidated version
VR-2026-093	Electronic invoicing issuing regime	In force	2	Scope unsettled for one company in the group
VR-2026-088	Proposal out for consultation — machinery safety	**Non-final**	3	New version of the proposal, tracked since March 2026

The "non-final" status is displayed on every screen where the document appears, and it does not get lost in an export: a text out for consultation that read like a text in force would produce a plan built on sand. It is also the moment when a contribution costs least, and file VR-2026-088 already carries the points to defend and the gap they would create at the client.

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
