Unknown scope — Ternoise Services, file VR-2026-093

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

The threshold quoted, the missing figure named, the question drafted · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional in its form: the company, its figures and the state of its connections are invented. **The three dates of the French electronic invoicing regime quoted below are real and verified. No write is made in any real system. The file says neither "applicable" nor "not applicable"** until the missing value comes back.

What is certain, and depends on no threshold

Obligation	Who	Since when	State at the client
RECEIVING an electronic invoice	Every VAT-registered business established in France, **with no size condition**	**1 September 2026**	**5 companies out of 7** registered and connected to an approved platform — confirmations collected
Prior registration	The same	Before the same date	**2 companies still to register** — registration is not retroactive

What does depend on a threshold

Category	Obligation to ISSUE	Group entities classified
Large companies and mid-caps	**1 September 2026**	Ternoise Holding, Ternoise Industrie
SMEs and micro-businesses	**1 September 2027**	Ternoise Levage, Ternoise Portuaire
To be determined	**Depends on the classification**	**Ternoise Services**
Outside scope — not established in France	—	Ternoise Belgium, Ternoise Maroc

The precise figure that is missing, and the person who holds it

Classification term	State	Source
Headcount for the 2025 financial year	**On file**	Entity repository deposited 02/09/2026
Turnover for the 2025 financial year	**On file**	Entity repository deposited 02/09/2026
Balance sheet total for the year ended 31/12/2025	**MISSING**	**Held by the group chief financial officer**

The question, drafted and ready to send

"*To classify Ternoise Services under the electronic invoicing issuing regime, one term is missing: the **balance sheet total for the year ended 31 December 2025**, as shown in the approved accounts. Headcount and turnover for the same year are already on file. What is expected is a closed figure and its closing date; as soon as it reaches us, the classification is computed and the file closes.*"

Three lines, one value, one closing date. That is the shape a useful unknown takes in this agent: it names what is missing, it names the person, and it says what unlocks when the answer arrives. **As soon as the value comes back, applicability recomputes without replaying the other 62 crossings** — only the crossing concerned is redone.

What the file carries in the meantime

Label carried	What it prevents
Unknown scope	A classification hypothesis entering the plan and later reading as a fact
The threshold passage quoted, with its page	The threshold being re-argued from memory at the next meeting
The missing figure named	The question being reworded differently at every reminder
The person to ask named	The request circulating without a recipient for three weeks

Question sent on _____ to _____ · answer expected by _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
