# Matching — four fictional advisories, four group assets

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

State, confidence, evidence, missing data · fictional document

**Fictional document — demonstration example**

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

**Fictional document.** All four identifiers carry the **DEMO-CVE** prefix: none corresponds to a real vulnerability, and no product, vendor or host named here exists. **A fuzzy match is never presented as a confirmed one** — that rule produces the fourth line of this table.

| Advisory | Asset / service | Observed version | Applicability | Confidence | Evidence used | Missing data |
|---|---|---|---|---|---|---|
| **DEMO-CVE-F01** | **portail-consolidation-groupe** Financial consolidation | **6.1.0** — affected range < 6.1.1 | **Affected, confirmed** | **0.99** | Version recorded in the configuration database; that week's scanner report | none |

| Advisory | Asset / service | Observed version | Applicability | Confidence | Evidence used | Missing data |
|---|---|---|---|---|---|---|
| DEMO-CVE-F02 | hub-tresorerie-centralisee Centralised treasury | 4.7.3 — affected range < 4.7.4 | Affected, confirmed | 0.98 | Version recorded in the configuration database | none |
| DEMO-CVE-F04 | reporting-reglementaire-herite Regulatory reporting | 12.0 — affected range 12.x | Affected, confirmed | 0.94 | Version recorded; vendor status « end of support » | none |
| **DEMO-CVE-F03** | **passerelle-identite-mutualisee** Identity for six subsidiaries | **unknown** — affected range unknown | **Under investigation** | **0.35** | **Product name alone — insufficient** | **version in service, deployment date** |

## Why the fourth case is not confirmed

DEMO-CVE-F03 is the most severe advisory of the batch in this fictional scenario, and it is declared actively exploited there. **That is precisely why the match is not confirmed on a product-name correspondence.** The service runs at a provider, under a group framework contract; its version is carried by no head-office database, and a holding company does not scan a provider's machine — it holds a contract against it. The confidence retained is **0.35**, the state is **under investigation**, and the consequence is written into the case: **closure is blocked until the evidence is filed.**

**Possible states, and what each allows:** affected confirmed → planning; potentially affected → review; **not affected, justified** → dated re-review, never a definitive closure; fixed → evidence required; **under investigation** → no score, review required; unknown → neither healthy nor fixed.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
