Isolation plan — remote-maintenance gateway

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Applied before the patch, with no line stop · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document, pending approval. Isolation comes before the patch** because it reduces exposure without consuming the stop night. It does not replace the patch: the case stays open until the fixed version.

The case

Item	Value
Advisory	**DEMO-CVE-O01** — affected range < 3.4.1, fix published in 3.4.1
Asset	passerelle-telemaintenance — service « Remote maintenance », owner: control-systems team
Score	**100 out of 100** — raw calculation 103.8, **bounded to 100**
Priority	**Immediate review** — rule **PR-KEV-001** and threshold
Exploitation	**declared actively exploited** in the scenario

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Item	Value
Exposure	**0.9** — reachable from outside
Safety impact	**0.7**
Rollback	**available**

The two stages, and what each costs

Stage	Measure	Line stop	What it reduces	What it does not reduce
1 — straight away	**Access restricted to a time window agreed with the maker and to its declared addresses**	**none**	**Exposure from outside beyond the window**	The vulnerability itself, which remains present
2 — stop night	Upgrade to **3.4.1**	the planned night	The vulnerability	Nothing more: the access restriction stays useful afterwards

What isolation does not do: it does not close the case and it does not lower the score. The score stays **100**. Only a **VERIFIED compensating control** subtracts points, and verification means a dated attestation — not an intention.

The maintenance contract stays served. The restriction covers a window and addresses agreed with the maker, written down, revocable. **The agent prepares the slot request; it changes no access rule on its own initiative.**

Site, maker, gateway and versions invented for the demonstration. They illustrate a situation common in the manufacturing subsidiary of a group; they describe no real site.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
