

# Isolation plan — remote-maintenance gateway

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Applied before the patch, with no line stop · fictional document

## Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

## Fictional document, pending approval. Isolation comes before the patch

because it reduces exposure without consuming the stop night. It does not replace the patch: the case stays open until the fixed version.

## The case

| Item         | Value                                                                                    |
|--------------|------------------------------------------------------------------------------------------|
| Advisory     | <b>DEMO-CVE-001</b> — affected range < 3.4.1, fix published in 3.4.1                     |
| Asset        | passerelle-telemaintenance — service « Remote maintenance », owner: control-systems team |
| Score        | <b>100 out of 100</b> — raw calculation 103.8, <b>bounded to 100</b>                     |
| Priority     | <b>Immediate review</b> — rule <b>PR-KEV-001</b> and threshold                           |
| Exploitation | <b>declared actively exploited</b> in the scenario                                       |

| Item          | Value                               |
|---------------|-------------------------------------|
| Exposure      | <b>0.9</b> — reachable from outside |
| Safety impact | <b>0.7</b>                          |
| Rollback      | <b>available</b>                    |

## The two stages, and what each costs

| Stage                    | Measure                                                                                       | Line stop         | What it reduces                                | What it does not reduce                                      |
|--------------------------|-----------------------------------------------------------------------------------------------|-------------------|------------------------------------------------|--------------------------------------------------------------|
| <b>1 — straight away</b> | <b>Access restricted to a time window agreed with the maker and to its declared addresses</b> | <b>none</b>       | <b>Exposure from outside beyond the window</b> | The vulnerability itself, which remains present              |
| <b>2 — stop night</b>    | Upgrade to <b>3.4.1</b>                                                                       | the planned night | The vulnerability                              | Nothing more: the access restriction stays useful afterwards |

**What isolation does not do:** it does not close the case and it does not lower the score. The score stays **100**. Only a **VERIFIED compensating control** subtracts points, and verification means a dated attestation — not an intention.

**The maintenance contract stays served.** The restriction covers a window and addresses agreed with the maker, written down, revocable. **The agent prepares the slot request; it changes no access rule on its own initiative.**

Site, maker, gateway and versions invented for the demonstration. They illustrate a situation common in the manufacturing subsidiary of a group; they describe no real site.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
