Verification statement — end of week

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

What the evidence allows you to say, and nothing more · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document. Simulated verification: no system was queried, no change was executed. **A partial fix never becomes an overall success, and missing evidence never becomes a closure.**

Case	Evidence obtained	Verification state	What the agent proposes
DEMO-CVE-F01 — consolidation portal	**Version 6.1.1 observed · simulated check negative · simulated change successful**	**Remediation verified**	**Closure proposed — pronounced by a human**
DEMO-CVE-F02 — treasury hub	Version 4.7.4 observed · simulated tests successful	Remediation verified	Closure proposed

Case	Evidence obtained	Verification state	What the agent proposes
DEMO-CVE-F04 — regulatory reporting	**None: no patch exists**	**Exception pending approval**	**No closure. Approval awaited, then dated review**
DEMO-CVE-F03 — identity gateway	**The provider did not answer in the simulation**	**Evidence missing**	**Case open · deadline running · escalation prepared**
DEMO-CVE-O01 — remote-maintenance gateway *(manufacturing subsidiary)*	**Simulated isolation applied · version 3.4.1 observed · simulated change successful**	**Remediation verified**	**Closure proposed — pronounced by a human**
DEMO-CVE-O03 — packaging controller no. 7 *(manufacturing subsidiary)*	**None: no fix is published**	**Compensating controls awaiting two signatures**	**No closure. Dated review**

The steering table, at the top of the report

Indicator	Value for the fictional week	Scope
Inventory coverage	**3 entities of 6, plus the 4 group assets**	Whole group
Assets with a known version AND owner	**3 of 4**	Group assets
Low-confidence matches	**1** (confidence 0.35)	Group assets
Fixes verified with evidence	**2 of 4**	Group assets
End-of-support assets	**1**	Group assets
Active exceptions	0 — **1 pending approval**	Whole group

Indicator	Value for the fictional week	Scope
Named missing data	**2**	Group assets
Manufacturing scope opened this week	**4 assets, 1 remediation verified, 1 file blocked, 1 awaiting two signatures**	Manufacturing subsidiary

Every indicator shows its scope and its period. « 2 fixes verified » means nothing without « out of 4 group cases, week of the scenario » — and it is that precision that makes the statement usable in front of a statutory auditor rather than in front of a committee.

The manufacturing scope enters the same report, under the same rules. The most useful exposure reduction of the week — isolating the remote-maintenance gateway — **cost not one minute of line downtime**, because it was handled before the fix and not instead of it. **The controller file stays open**: no fix exists, and compensating controls are an interim state, never a solution.

Company, subsidiaries, provider, assets, advisories and results invented for the demonstration. They illustrate a common situation; they describe no real group and are not a measurement of the agent's performance.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
