

Two resolutions — one sitting, two amounts

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

30/07/2026 · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Neither resolution is named as the right one.** The minutes record both votes and do not connect them.

Element	Resolution no. 7	Resolution no. 12
Time of the vote	7.05 p.m.	7.45 p.m.
Subject	Development project	The same project
Amount	€1,480,000	€1,380,000
Vote	Unanimous	Unanimous
Mention of the other resolution	None	None

What was looked for in between

Search	Result
Amendment in the minutes	None

Search	Result
Re-vote	None
Adjournment	None
Explanatory note	None

The two possible readings have opposite consequences. If no. 12 corrects no. 7, it should say so; if one of the two figures is a transcription error, both were voted in good faith and it must be known which to correct.

What is provided

Element	Provided?
Both texts side by side	Yes
The minutes extract for each	Yes
The name of the clerk of the sitting	Yes
A drafted correction	No
An opinion on the correct amount	No

The correction is decided before sending. After transmission, two contradictory acts of the same day on the same project will draw an observation, and a corrective resolution will be needed at the next sitting.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
