Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **An act leaving the window without observation is not a validated act.** The legality review is not an approval, and a third party can always challenge an act before the court.

Situation	Acts	What it allows
Leaving this week	**4**	**Starting with reasonable safety**
Leaving this month	11	—
Leaving next month	16	**Waiting may be justified**
Total inside the window	**31**	—

Which date the tracking rests on

Date	Used?	Why
Date of the act	No	**The period does not run from it**
Date of sending	No	**Receipt may differ**

Date	Used?	Why
Date of the acknowledgement of receipt	**Yes**	**It is transmission that starts the period**

The State representative refers to the administrative court the acts it considers contrary to legality within two months of their transmission — **article L2131-6 of the general code of local authorities.**

What this tracking does not say

Question	The tracking's answer
Will the prefect refer this act?	**The tracking has no idea**
Is the act lawful?	**The tracking has no idea**
Can a third party still challenge it?	**Yes — and that does not depend on this window**

> **A point few authorities use:** on request, the State representative informs them of an intention not to refer an act that has been transmitted. The same article provides for it — and it has to be asked for, act by act.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
