Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The agent does not say this act is unlawful.** It records an absent transmission, and that absence has a calendar consequence, not a legal one.

Element	Value	Source
Act made	14/07/2026	The act itself
Signed	**Yes**	The act
Applied since	**14/07/2026**	Implementation file
Trace of transmission	**None**	**Transmissions register**
Acknowledgement of receipt	**None**	**Acknowledgements inbox**
Start of the two-month period	**Not triggered**	**Art. L2131-6 CGCT**

The rule cited, and its single reference

The State representative in the department refers to the administrative court the acts it considers contrary to legality **within two months of their transmission**.

Article L2131-6 of the general code of local authorities. It is the only legal reference cited in this whole demonstrator; everything else is drawn from the authority's own acts and correspondence.

> **Without transmission there is no starting point.** The act stays open longer than the authority imagines, and that situation lasts as long as nobody notices.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
