> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **The eleven observations that no longer recur are the most interesting part of this document**: they show what the authority genuinely corrected, and that is written down nowhere else.

Situation	Observations	What it says
Point now held	**11**	**Corrected, never seen again**
Point still recurring	**7**	**The correction did not hold**
Isolated case, never repeated	5	Nothing to draw from it
Total	**23**	—

The seven that recur

Subject of the observation	Received	Later acts concerned	Most recent

Display wording to be made precise	**02/2026**	**3**	**Last week**
Citation of a resolution to be dated	09/2025	2	05/2026
Identity of the signatory to be stated	06/2025	4	03/2026
Reference to an annex not attached	03/2025	2	01/2026
Numbering of articles	11/2024	5	04/2026
Incomplete enforcement clause	07/2024	3	02/2026
Statement of avenues of appeal	04/2024	6	06/2026

> **None of these seven is a drafting fault: they are formulations that reinstall themselves** because the templates in use were not updated after the observation.

What is proposed for the first

Element	**Content**
Observation received	02/2026 — display wording to be made precise
Later acts drawing no further remark	**9**
Wording used in those 9 acts	**Supplied, as it stands**
Written by the agent	**No — it is your drafting**

The wording proposed is not written by the tool: it is extracted from nine of the authority's acts that followed the observation and never drew a further remark. It worked, and it simply has to be reused.
