Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Nobody is named, and no named time statistics are produced.**

#	Flag	On what	Recipient
1	**12% unallocated time**	**1,460 reports**	**Team lead, as a volume, no names**
2	**31 doubtful charges**	**Activity traces**	**The person concerned, before sending**
3	**68% entered on the last day**	**Entry log**	**Overall figure, never who**
4	**Proposals erased on validation**	**Design rule**	**—**

Five guarantees that make each report the words of whoever signs it, and that is what makes its figures usable

What the agent rules out	Why

Validate or send a report	**It would carry a machine's guess**
Validate automatically on expiry	**The agent's error rate: 34%**
Keep a pre-filled version after validation	**The gap would read as an accusation**
Produce named time statistics	**The report already measures**
Spread unallocated time pro rata	**Wrong figures that look right**

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
