

# Six constraints, six hundred and sixty-four slots, no option

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Four months · fictional document

## Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

**Fictional document**, produced for the demonstration. **A dead end announced can be loosened; a dead end left unsaid repeats every month** — and nobody knows which lever to pull.

## Where each constraint cuts

| Constraint applied                     | Slots removed | Slots left |
|----------------------------------------|---------------|------------|
| Working slots 09:00–17:00, four months | —             | <b>664</b> |
| Not Friday afternoon                   | <b>68</b>     | <b>596</b> |
| Outside the Tuesday production morning | <b>68</b>     | <b>528</b> |
| Seven days' notice                     | <b>40</b>     | <b>488</b> |
| <b>Twelve-seat room with video</b>     | <b>447</b>    | <b>41</b>  |
| <b>All twelve participants free</b>    | <b>41</b>     | <b>0</b>   |

LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

**The constraint that closes it is the last one, not the room.** Of the 41 slots left, the best brings **ten participants out of twelve**, and two share no slot with the other ten across four months. **Neither the reason nor the names appear here:** this is a timetable problem.

## The three loosening, costed

| Loosening                               | Slots opened           | Bringing all twelve | Verdict                            |
|-----------------------------------------|------------------------|---------------------|------------------------------------|
| <b>Eight-seat room + video for four</b> | <b>214</b>             | <b>27</b>           | <b>The cheapest</b>                |
| Notice cut from 7 to 4 days             | <b>40</b>              | <b>0</b>            | <b>Settles nothing</b>             |
| Committee held with ten of twelve       | <b>41</b><br>unchanged | <b>3</b>            | Decision note to the two absentees |

## The seven false dead ends

| Measure                            | Before the fix      | After the fix                                  |
|------------------------------------|---------------------|------------------------------------------------|
| Flags produced                     | <b>26</b>           | <b>40</b>                                      |
| <b>False dead ends</b>             | <b>7 — 26.9%</b>    | <b>0</b>                                       |
| Calendar not opened                | Counted <b>busy</b> | Counted <b>unknown</b> , neither free nor busy |
| Unknown calendar named in the flag | No                  | <b>5 flags — 3 settled with a message</b>      |

**Counting an unseen calendar as busy manufactures dead ends.** The unknown is written as unknown, with the question to ask: that is what brought the seven down.

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
