Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **On one occurrence, moving is simple. On a series it never is.**

What the agent places alone

Case	Placed alone?	Why it is safe
Occurrence of an already approved series	**Yes**	**The decision was taken at creation**
Conflict-free move	**Yes**	**The target slot is free for everyone**
Cancelling an occurrence whose purpose has ended	**Yes**	**Nothing is lost**
Meeting where all share a free slot	**Yes**	**No arbitration**

What still needs somebody's approval

Case	Why
Creating a new series	A recurrence is a decision taken once and applied a hundred times
Move producing a conflict	Somebody loses a slot
Cancelling a whole series	It may serve somebody who does not say so

The simulation run before every series move

Effect of the requested move	Value
Future occurrences moved	40
Conflicts produced	6

> That is exactly what the calendar does not show at the moment of clicking.

The flag raised in every case

Finding	Value
Series continuing after its purpose ended	8 months
Occurrences held	34
Participants	11

Nobody did anything wrong.

For the company to settle

Cases open to automatic placement: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
