Document issued on 24/09/2026

512 applications · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **312 files never opened is not a sort: it is an abandonment.**

Item	Kept?	What it allows
The four elements recorded, with their page	Yes	Justifying an ordering
Was the file opened?	Yes	Seeing the 312
Reply sent and its date	Yes	Answering the candidate
Ordering and the criteria that produced it	Yes	Contesting it
Requests for human intervention	Yes	Evidencing art. 22
Any appraisal	No	None is produced

The figure that indicts the process, not the candidates

Finding	Value
---------	-------

Applications received (2 to 24 March)	512
Never opened	312
Post filled	Before they were opened

What can be put right in a day

Finding	Value	What they are waiting for
Applications with no reply at all	214	A sentence, not a job
Of which over three months	118	Same

The defect nobody goes to check

Finding	Value	How it reads
Files in a format the tool does not convert	9	The file appears empty — therefore contentless

For the company to settle

Retention period for an unsuccessful application: ____ months

Target reply time to any application: ____ days

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
